

Aurukun Offices – 200 McLeod St

Client: Aurukun Shire Council

Location: 200 McLeod Street, Cairns North

Scope:

The clients need to transform this run down graffiti building into a modern office and administration centre for the Aurukun Shire Council, meant creating a welcoming space.

By removing blockwork from both long sides of the building, and creating openings for new large windows and entry doors, this buildings access changed from the front of the building, to the side of the building. Making this building more appealing to the eye and welcoming.

The internal of the existing building had the removal of all asbestos linings, and new partition walls and glazing, grid ceiling and new carpet tile floors. A staff lunchroom and new toilet and cleaners amenities were designed to cater for all abilities.

The reception counter has been designed to be welcoming and secure, with a meeting room at the front for easy access.
